

# SENTRYHOUND™

## CELL PHONE DETECTION SECURITY PORTAL

### DETECTS ANY CELL PHONE ON OR OFF

SentryHound excels where common metal detectors fail by reducing false triggers using highly sensitive sensors. This gives it the ability to detect phones in pockets, purses and even body cavities for the most comprehensive TSCM.

### MULTI-ZONE LED ALERTS & SIRENS

SentryHound contains 12 ultra-sensitive and independent cell phone detection zones lighting up according to location on body / distance from detected phone as well as audible siren with adjustable volume.

### ENFORCE YOUR NO CELL PHONE POLICY

SentryHound is perfect for any security team or venue with a NO CELL PHONE POLICY in place. Setup & operation is quick and simple in a variety of spaces including government & military SCIFs, educational, corporate & correctional facilities. SentryHound also avoids invasive and time consuming searches in public spaces such as court rooms, concert halls & theaters.

### SECURING YOUR FACILITY

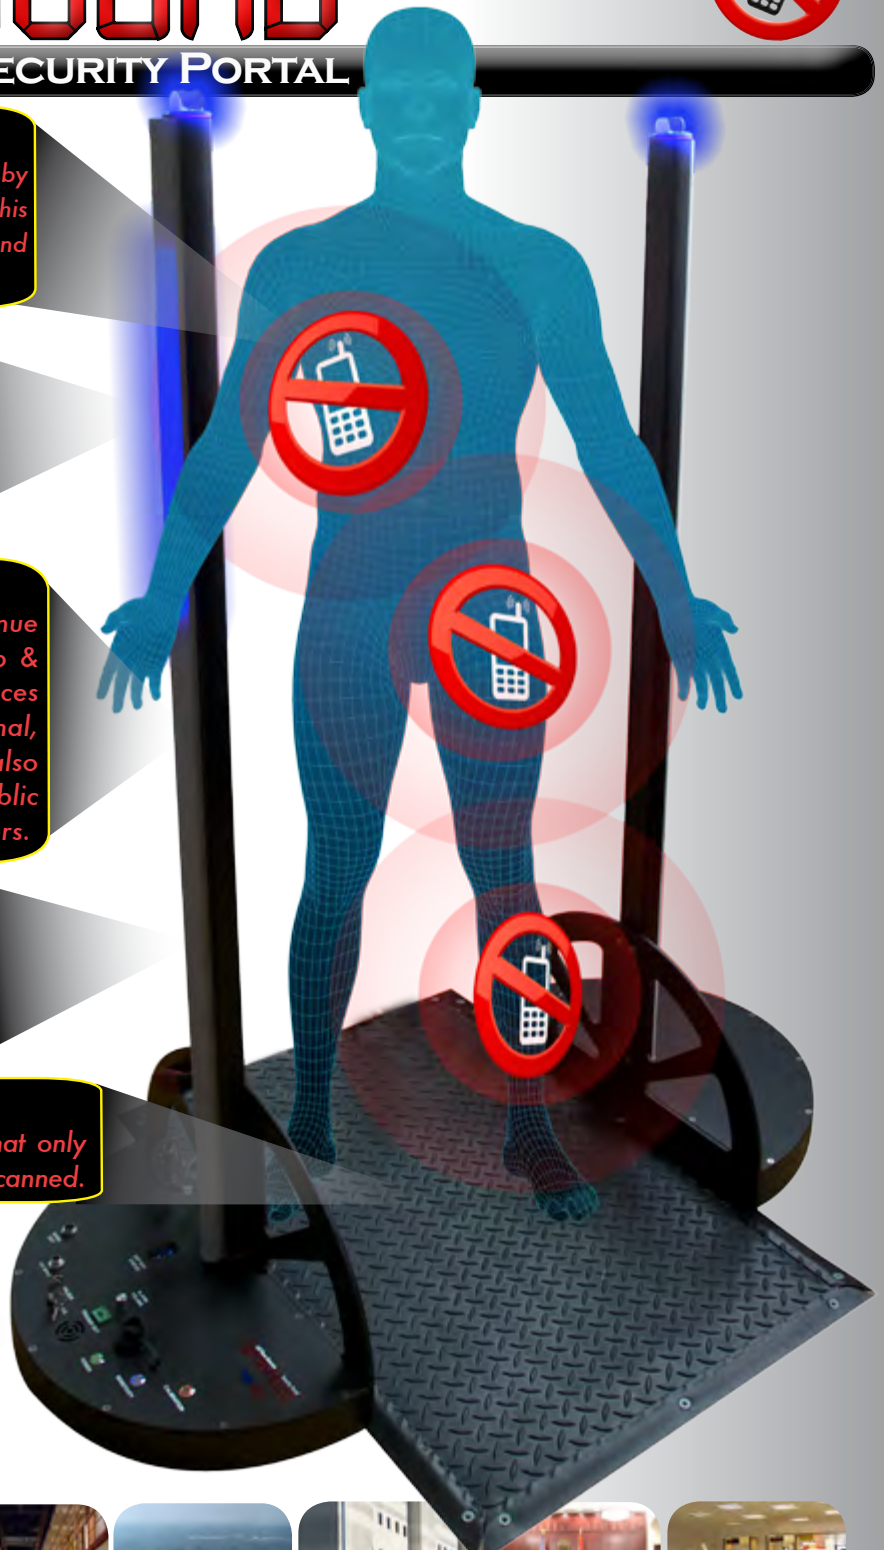

SentryHound detects ferromagnetic materials. This includes all cell phones but also many knives & guns too with sensitivity rivaling expensive and complex metal detection systems.

### RUGGED PRESSURE TRIGGER MAT

SentryHound includes a pressure switch ensuring that only suspects passing through its sensors will be instantly scanned.

### MADE IN THE USA

SentryHound is both AC and DC powered (internal rechargeable battery power) for independent operation anywhere. The unit is rugged and lightweight with easy assembly, operation and transportability.

Prisons & Correctional Facilities • Courtroom & Municipal Buildings • Law Enforcement Agencies • Government & Military SCIFs • Universities & Testing Facilities
